Podd

Children of all ages are fascinated by Podd. He knows over 100 actions and will perform these actions as they are typed in and spelt correctly. Children are inspired by the challenge of discovering and recording the actions. They will hunt for new actions while discussing ideas, drawing on their vocabulary, trying synonyms and referring to the dictionary for help. Initially Podd performs one action at a time but later will perform 2–5 actions consecutively.

Podd is excellent at promoting language and improving spelling. He gives children hours of fun whether they are playing alone or with friends. Podd relates to early levels of English ATs 2 –4.

The Concept Keyboard version of Podd encourages younger and less able children to join in the fun. Simple to use and with facilities for using your own words as well as the words that Podd can recognise, you can easily extend your language activities. Six example overlays are included in the pack to get you started.

You can also use the Concept Keyboard version of Podd with switches.

Podd is available for the Acorn BBC model B, B+ and Master 128; IBM PC and compatibles; RM Nimbus PC186 and the Apple II range.

Concept Keyboard Podd is available for the Acorn BBC model B, B+ and Master 128.
